

# **426th Knowledge Seekers Workshop**; 31 de Março, 2022

(Índice rápido (na maior parte completo 5 p) Transcrição toda feita em inglês, Parte 1 checada; precisa checar Parte 2 , palavras-chave frases ) (Magrav parte 10 Trecho)

Contém apenas o Índice Rápido e a Transcrição (em inglês)

## **Índice Rápido**

A FK tem que preparar documentos para pedir aos governos que recebam a Unidade de Aprimoramento de Voo como um presente; É um longo processo de 1 a 2 meses - estamos nos organizando agora; Universidades ou institutos podem assumir a responsabilidade pelo desenvolvimento da Unidade; Países com empresas da FK não precisam passar por este processo; Como a Unidade de Voo navega até a posição exata; Porque os campos Magnéticos estão conectados a tudo no Universo, então eles trabalham através do acordo de alma; Você não aparece em algum lugar e a alma não está lá; É um acordo pré-definido das almas para o tempo e o lugar; Os pilotos terão que entender novos conhecimentos dos campos Magnéticos; As almas são plasmas dinâmicos assim como a comunicação; O capacete de Visão de Aprimoramento será usado com a Unidade de Voo como controle de voo; Unidade de Voo pode ser transformada em qualquer sistema que você precise - saúde - bem estar - voo;

Ainda não fomos ensinados como mudar Gans de volta ao estado de matéria - há uma técnica para fazer isto; Não conseguimos converter Gans em Gans da vida; A Unidade de Aprimoramento em Linz não tem um destino, então está absorvendo campos de interação e não vai a lugar algum; Materiais de construção na lua - força de campo diferente - a madeira pode se transformar em plástico; Necessita de uma composição de materiais; Capaz de mudar as cores dos objetos - satisfazendo a emoção da alma; A FK está desenvolvendo sistemas chamados "Sistemas Integrados de Plasma"; Edifícios não com tijolos - com estruturas de plasma composto - conversão de energias; Aprenda a fazer divisórias de plasma para dividir espaços em salas; Tudo será construído na Unidade de Voo, até mesmo as emoções; Grande lacuna em nosso conhecimento, fábricas estão produzindo coisas, mas não entendem a base disso;

Em vez de usar Gans para tudo - nós mesmos nos tornamos como um sol - fonte de energia para alimentar plantas e animais, etc; Por que ensinamos o Copo da Vida - 5 Copos - Copo do Homem - Copo do Universo; Com os Copos você pode ver como você vai ficar quando for transferido para o planeta Zeus; Os Copos lhe dão um teste antes de viajar; Você disse que gostaria de ser um gato na próxima vida - crie condição de gato no Copo do Universo - como se sente ao ser um gato;

Implicação e aplicação desta Tecnologia é tão profunda - alguns de vocês nunca entenderão completamente a totalidade dela; Elevação da Alma do Homem para se tornar uma imagem do Criador;

Aprendam a ler as palavras ocultas dentro dos ensinamentos;

Se você entender as interações de campo você pode criar um deserto no Pólo Norte; Exemplo dado dos 5 Copos mudando de cor mesmo que a composição seja a mesma - Porque os Copos estão definidos para o estado de alma - a presença de sua alma muda a transferência de energia de campo entre os Copos e o ambiente e como elas se manifestarão na fisicalidade; Entenda a radiação de campo dos 5 Copos - como eles interagem - conectam - dividem - e aprimoram; Você verá o brilho de sua própria imagem nos 5 Copos; Por exemplo - se uma radiação de campo estiver errada você pode não ver a seção do meio da Pilha de 5 Copos, mesmo que elas ainda existam;

Em Linz - podemos transferir você de uma Unidade para outra; A Tecnologia é completa no conhecimento do homem, é para você entender - interpretar e desenvolver; Quando o transportamos para o planeta Zeus mantemos a mesma alma e emoção - mas a manifestação física será de acordo com as condições do planeta Zeus; Jogo jogado com seu filho - fingindo que ele não podia vê-lo, mas podia ouvi-lo - a criança acreditou e estava pulando por aí para confirmar sua existência; Se você se transferir de Londres para Teerã para ver Azar, mas não conseguir a força de campo correta - ela pode sentir você, mas não pode vê-lo; se você errar a força de campo você pode pousar em seu rim e não será capaz de manifestar o tamanho de um homem; agora o homem e os cidadãos do Universo, juntos, recebem este conhecimento ao mesmo tempo - cometerão muitos erros no início, durante a viagem, até que vocês aprendam;

Ensino sobre MaGrav (ver trecho de MaGrav parte 10 da FK Brasil); Não há diferença entre MaGrav e ímãs de estado sólido da terra - exceto que você pode controlar a força de campo do MaGrav; Coloque 2 ímãs um ao lado do outro e gire - você gera eletricidade; O MaGrav está em estado plasmático; (Os mesmos campos estão saindo tanto do ímã quanto do MaGrav - você só tem que girar fisicamente os ímãs para gerar eletricidade porque eles são estado de matéria. Enquanto os campos de MaGrav são plasma dinâmico - e se você cruzar os ímãs na frente dos campos de MaGrav e encontrar uma maneira de extrair eletricidade dele - talvez fios de Cobre??); A estação elétrica tem estado sentada na sua frente;

O MaGrav é o fornecedor de energia - O Copo do Universo é a panela - O Copo do Homem é o que você coloca na panela - para obter o que quiser; Você está perdendo parte do conhecimento - você não está conectando a panela; MaGrav é um dos geradores mais poderosos do Universo; Nós trouxemos o conhecimento para você se igualar à alma do Universo - para que todos (no Universo) sejam iguais; (estou lhes mostrando) para estender a força da alma do MaGrav; os agentes do diabo lhe disseram para destruir seus 5 Copos para que possam continuar escravizando o homem na dimensão da fisicalidade - estes são pedófilos que abusam da fisicalidade e o resto - tentando manter o homem no lugar onde ele pode ser abusado - aqueles que os seguem são da mesma escola de pensamentos;

Nós lhe demos a liberdade através da Alma do Homem e lhe ensinamos passo a passo com tempo suficiente para compreender o conhecimento; A pandemia do Coronavírus foi

um presente porque lhe ensinou sobre a interação dos campos através do Copo da Vida; Ainda há mais níveis de ensino por vir; Se você entender como brincar com os campos você pode fazer qualquer coisa;

Muitos de vocês se tornarão os passageiros da nova Unidade de Voo, ou naves espaciais - este é o propósito de todos estes ensinamentos; Mas não queremos que vocês mudem o tamanho da prisão do macacão da NASA para a caixa ou para a nave da Unidade de Voo;

Trazer mais almas para entender trará a mudança; há aqueles entre vocês que estão no nível para entender o que planejamos para os próximos ensinamentos - como converter estes campos em um campo universal, ou para campos da fisicalidade do homem, ou para campos da Alma do Homem; Quando Jon caminhou por sua configuração de MaGrav ele deveria ter feito esta caminhada (Sr. Keshe traça uma linha através dos MaGravs) - mas o conhecimento não estava lá; 18 milhões de combinações são suas chances de ganhar a loteria - mas a conexão da alma para navegação em voo já atingiu o prêmio principal - é automática;

Se você sabe como aproveitar a energia universal, seu MaGrav pode alimentar toda a sua cidade; Olhe dentro da forma de seus MaGravs - eu lhe dei a interação com a alma do Criador - você tem que encontrar isto; Entenda como fazer suas bobinas na dimensão da alma do Universo, não na fisicalidade; Sobre isto está o Copo do Universo; eu lhe mostrei o caminho para o Criador - você tem que desvendá-lo; eu chorei muitas noites - "quando a humanidade entenderá o presente do MaGrav que lhes dei"; MaGrav pode elevar sua alma - aproximá-lo do Criador;

O dia em que você entender o ensinamento de hoje, é o dia de Methi - esse dia é hoje - muitas de suas almas foram elevadas para compreendê-lo - é sua fisicalidade que tem que aceitá-lo e aceitar o conhecimento e viver dentro dele; tente não copiar - compreender;

### **Visualização do MaGrav**

O mesmo gerador existe na estrutura de seu cérebro - você não precisa do MaGrav que é baseado na fisicalidade; a bobina inferior é a unidade de reprodução - a bobina do meio é o intestino e o coração - a bobina superior é a dimensão da Alma da Fisicalidade na posição da Alma do Homem; sua pilha de 3 já está configurada;

Coloque seu dedo na tomada e alimente sua casa com energia - ou você alimenta a alma e recebe a luz do Criador; o homem negou a si mesmo esta beleza - por escolha; Viemos à terra para experimentar os prazeres e dores do homem - para entender o que mantém o homem longe de entender sua própria criação, e de ver que seu próprio criador dentro de si mesmo; Tivemos que provar e apreciar a beleza da vida terrena para podermos compreender como atrair o homem para a beleza do conhecimento da criação; (Esperamos que o homem tente elevar sua alma com o MaGrav, em vez de reduzir seu consumo de energia em 30%) ;

Colocamos os sistemas MaGrav nas Unidades Verticais de Aprimoramento porque ela está pronta para fazer o trabalho de transporte e transmutação; não há tecnologia de

plasma mais poderosa que o sistema MaGrav; Quando vi os visitantes em Linz rolando os olhos quando viram as unidades de MaGrav na Unidade Vertical - disse a mim mesmo, o homem ainda não está pronto para entender - fomos muito rápido - muito cedo; O pai comprou o brinquedo de 14 anos para a criança de 2 anos; O pai comprou o brinquedo para si mesmo, tentando ficar feliz por seu filho o ter em seu nome? Quando se chega ao ponto de entender que se pode brincar com o brinquedo;

O cérebro, a alma, o conhecimento, não cabe na Alma da Fisicalidade, para que ele possa brincar com a Alma do Universo; Não há limite de idade - é a maturidade de entender o conhecimento da criação; É você quem decide esse ponto quando o conhecimento será absorvido e compreendido; Você entende o conhecimento da maneira que lhe é ensinado, ou da maneira que lhe convém (Uma criança imatura entende as coisas da maneira que quer que sejam para si mesma - não da maneira que é na realidade - então os problemas surgem porque não entendeu corretamente);

Nós lhe ensinamos o Magrav para que vocês se tornem viajantes do Universo - mas você está escolhendo usar o Magrav apenas para a eletricidade; (Este é o problema - é para você entender o que você está escolhendo e é isso que você realmente quer?)

#### Intervalo

Sr. Keshe conta a história da semente preta da lagarta da seda e como você cria as interações do campo Magrav com ela, colocando-a em uma folha de amoreira e esperando a lagarta para emergir, e então ela começa a se colocar em um casulo com seda, finalmente a borboleta emerge e é livre; A Unidade de Aprimoramento é este casulo, trazemos a fisicalidade do homem dentro dela e nutrimos com o conhecimento da criação e você rompe com a liberdade da alma - que é o ponto de mutação e conversão; No futuro o homem vai fazer esse casulo de seda da alma de si mesmo, e permitir que a sua Alma da Fisicalidade se torne incorporada na Alma do Homem, e, em seguida, tomar o voo da imaginação em qualquer lugar do Universo e começar um novo ciclo de vida;

Não somos pró-americanos ou pró-russos - queremos entender a verdade do que está por trás do conflito para encontrar uma verdadeira solução; Discute sobre o envolvimento americano em laboratórios bioquímicos e antigas instalações nucleares russas que desenvolvem armas nucleares com os ucranianos ... Começou como um conflito entre a Igreja Católica Romana tentando assumir a Igreja Ortodoxa Russa (como uma aquisição corporativa), então outros vieram com suas próprias coisas; Ocidente está fazendo na Ucrânia o que eles fizeram na Líbia, Iraque e outros;

O Sr. Keshe ensinou aos romenos como usar os Gans em caso de radiação nuclear ou contaminação bioquímica. Manter 3 Gans de CO<sub>2</sub>, CuO, CH<sub>3</sub> e muitos Aminoácidos - também Copo 1 e 2; Borrifar Gans com bastante Aminoácido no exterior da casa e carro para prender os contaminantes; Vai demorar meses para dissipar no ambiente; Pode usar 0,9% de água salgada para lavar - seja paciente leva tempo para trabalhar; Pílulas de iodo não funcionam - usar nozes embebidas 24 horas e misturada com Gans de CO<sub>2</sub> e Zn com bastante Aminoácido;

Entrega das Unidades de Voo vai derrubar as fronteiras, parar as guerras; Estes conflitos são alimentados pela família Rothschild; Mandado de prisão para Soros na Rússia por iniciar a guerra na Ucrânia e na China para a revolta de Hong Kong; É trabalho dos BC elevarem a alma dos líderes mundiais com o apoio do Conselho Universal; Unidade de Voo para a NASA ; Ucrânia como país neutro não vai funcionar, precisa de solução permanente da paz mundial;

Pílulas de iodo e potássio realmente não funcionam, experiência na indústria nuclear; Teletransporte impossível no estado matéria - braço aparece nas costas . necessidade de mover a alma tudo vai com ela intacta ;

Central nuclear para transferência de 1 célula - Magrav sem fonte de energia transfere a Alma do Homem;

O que acontece quando duas pessoas entram na Unidade de Aprimoramento; Não estamos em processo de cura, isto é para os médicos ;

Conexões de fio nano revestido; Nano revestimento antes e depois do enrolamento das bobinas; se a ruptura no Nano revestimento se tornar estado de matéria elétrica;

3 pessoas poderosas ficaram chocadas com a visita a Linz para ver a Tecnologia, como eles não sabiam sobre isso - os tomadores de decisão vão tentar espalhar rapidamente por toda a Europa;

Vidro é estado material; Processo de fazer Gans não é apenas por aquecimento - permitindo equilibrar energias com o seu ambiente ;

A água é um detentor de Gans - mas em uma condição de campos plasmáticos;

O óxido de Ferro na China é convertido em Nano e depois lavado no Mar do Norte da China - início da vida - vida marinha abundante;

Procedimento especial para criar sangue puro, combina com qualquer tipo de sangue humano, animal ou coisa viva no planeta - foi testado pela FDA em Gana ;

Teoricamente, as técnicas de respiração poderiam ajudar a absorver campos radioativos - mas praticamente muito difícil;

Discussão sobre 5+1 - Os EUA colocam novas sanções no movimento político do Irã para afastar o Irã da Rússia e da China; Tentando impedir que a Rússia e a China iniciem a moeda do BRICS como uma moeda mundial; o Irã acaba sendo um bode expiatório para muitas coisas;

Sob nenhuma circunstância girar ou brincar com Gans de Chumbo - deve saber exatamente o que você está fazendo e estão protegidos; Chumbo na gasolina baixou o QI e aumentou Alzheimer; Você não tem que secar noz pode usar fresca - pode ferver, mas obtém outras coisas dela; Há uma maneira específica para fazer Gans de Trítio e Deutério - teste com ímã;

Se o seu copo seca pode apenas colocar mais água nele - não precisa começar de novo;

O petróleo bruto é um Aminoácido em suspensão da interação do campo atmosférico - é como a água; Ao mudar os campos ambientais Magnéticos do petróleo você pode mudá-lo para um vapor ou sólido sem aquecimento - é dependente de condições ambientais;

Q: Devo olhar apenas para a saída do que eu faço e não a entrada?

K- Não, a saída vai decidir por si. Quando você olha para o que você está fazendo você julga a si mesmo. Um homem nunca deve julgar a si mesmo dessa forma, pensando: "Eu estou fazendo muito." Porque, em seguida, às vezes, a arrogância assume.

Q: A saída não deve equilibrar com a entrada?

K- Não necessariamente. Se você esvaziar uma lacuna - às vezes isso permite que você receba de uma ordem superior. Nunca meça o que você faz.

Eu sempre digo, dê mais da sua alma para os seus inimigos, porque eles precisam. Você precisa entender seus inimigos, você pode descobrir que você é a causa da animosidade entre você e seu inimigo. Tente se tornar consciente - em vez de tentar mudar as pessoas que você não gosta.

Todos os Aminoácidos não são os mesmos porque os plasmas que os compõem, Hidrogênio, Nitrogênio, Oxigênio têm pequenos desvios na força de campo; Também depende das condições ambientais quando você fez o Aminoácido - o gato andou próximo ao recipiente? - O bebê chora? - A música foi diferente? - A esposa grita no corredor? - todos esses fatores alteram a composição do Aminoácido na mistura;

Sr. Keshe mostra uma caixa que ele fez no laboratório com 24 compartimentos e como cada um muda de cor e de características continuamente de acordo com as condições ambientais; Foi também o primeiro gerador de energia a plasma - alimenta uma luz durante anos - mas pode ficar entupido com Gans;

Nós ainda não temos o conhecimento para ser capaz de replicar Gans - como o Ketchup Heinz - é sempre o mesmo;

Há uma raça fora deste planeta que dominou este jogo de replicar Gans - quando o homem se tornar pacífico talvez eles nos ensine; Eles dominaram o jogo de mudar os campos no nível mais baixo - em uma única estrutura atômica como um campo; A caixa com 24 compartimentos está no vídeo de Fukushima; Esta foi uma das primeiras unidades geradoras de energia usando a tecnologia de plasma.

## ENGLISH TRANSCRIPTION

start proofing (part 1 done )

(:12).

K- ... from somewhere on this planet and somewhere point in the U. We welcome you back ... Before the part of the teaching Rick asked me a question to clarify in respect to many of your questions about the spaceship units (FEU). The FEU and the documents for it for some of you who want to submit it to your governments, or your institutes and universities to make the request to receive it, will be put together in the next couple of weeks, completely with the headquarters, and everything else to go with it that the officials can take step. When you do such a thing, the majority of the time, it's not just that you approach the government. Government goes through Foreign Office, FO goes through the embassy and they usually have someone in the embassy who is scientific attaché, or something to do with the science part. Then they appoint them to check, to come to see, and then get the documents, they report back to their OF, and FO goes to the government, or to the university. This is the normal procedure, it will take about 1 or 2 months, depends on how much you push. So we are setting that structure up, that we have the .. personnel support to handle the embassies and scientific organizations. ..

It's not just you walk in and they yes, you get the gift. It will take a month, (:14). or two for them, and everything goes through a diplomatic, it's not just you walk in and they accept your word, and they do it. You submit the documents we give you, and then we give you a letter of a gift of a unit to the country, and you ask it to be brought, most probably for a university, who can take charge of it, because governments don't do these things themselves, and you have to find a university ?? and this university is prepared to do it, or this institute is prepared to do it, and then they accept responsibility, and it gets done.

We expect a lot of paperwork, and we have to get our end sorted out completely, to give you the units. But the units, which we control, we don't need to satisfy the governments. It will be done by us, Arizona (AZ), Tehran, Austria, Beijing. Most probably we'll land one into Nigeria to Alekz, with the support, we already have a company there. Now it gives us, this allows, we can go to Australia directly, because we already have companies there. Philippines is another point, we are there. We can shortcut to our end, and invite to do. So the first units which are getting to go, will go in these positions, where we have a .. reference when you go, it's already been done.

We are ready to ship the first units in the next few days, and with it, once we have everything we want cleared in the shipping, AZ, and Tehran and Austria will receive their units as it comes up. Then we have others to go to, and we build it up that way. But those of you who have no point of reference, they have no company, (:16). KF that we can work through, then we'll go through. You have to go through the diplomatic, and universities to find the right match. We already have a setup in UK, so we can go directly into the structure.

The same is with Brazil, it is easy for us, because we already have an established company there. This will be done in that process, and that needs time. We have to prepare our side, there is a lot of movement in the background with the KF. We don't announce it anymore, because we used to do it, we get a lot of problems with a bunch of hooligans on

the Internet. So we do it, we give you a point of reference, and when it comes in there, it will be handled by people who are appointed to do it. ...

I hope that answers a lot of your questions, .. we are in the process of a lot of changes, a lot of movement, we are waiting for one thing to clarify in the KF, in the background then we can proceed with the rest of it.

## **Teachings**

In regards to the teachings of what I call, understanding the process of the interaction of the fields. A lot of you .. or a lot of people have a problem, that, how do I recognize I want to land on the house number 6, on ?? this street, and not on number 4? (:18). I don't land in the wrong place. How accurate is the system? How do we land in the position? How can I know I want to land on the North of the Moon, not on the South Pole of the Moon? How can I pinpoint accuracy to where I want to go. This goes back to the total understanding of the interaction of the fields in the U. Is part of what we call, the communication line, of what we have, and what we choose to have.

This is me with my soul, and I want to land here first, at #4 in the city of Tehran, on the streets of whatever. This is the position I want to be. Then after that, I want to go to NY on the 5th Avenue to see Azar in her surgery. How do we do it? How do we know we land in the place, and how do we know, that when we arrive here, Azar is in the surgery and not have traveled to Tehran for the New Year. Where you just came from.

Go back to the teachings ... (:20). to the understanding that every magnet has a connection with every M fields, every element ever produced in the U, through the system, through the structure of the soul. When you enter the FEU and you enter .. the control unit, you are sitting here, what I call, with a hair dryer on top of your head, and with your soul centered, beautifully dressed, waiting to fly. You have, you have Azar in Tehran, you have the position 1, and then the soul of Azar, 2, pinpoint accuracy, because one of these links (M fields) is connected to the position and place of the wish, and one to Azar.

In a way, the soul of Azar brings you to where she is. Because there is more communication in the line. You don't go there and find out, oh, sorry she is not there, I am in Rome. But before you take the flight, the soul of, the way you communicate, the way you understand, is I don't have time to see you, come tomorrow. (:22). You don't take a flight, because the soul has already agreed on a time, position, and a place.

You want to travel to the north Pole of the Moon, you still have a M field connection, one of these lines is already connected. The transportation and transmutation (T&T) of the future, is understanding the flow of the M fields. If you go back to the teachings of the past, I have mentioned quite a few times, the human scientists, the knowledgeable scientists of this planet up to now, have not managed to measure the field strength, individual field strength of a magnet. Which is static, when it comes to the plasma (PI) of the soul, when it comes to the PI to the soul of two people, or in the ?? verse dimension

(D) of the U. These things (M field lines) are not this shape, these things are emotion, and some are connected. At the same time your soul is not a solid magnet, sitting there, it's a dynamic Pl. So you are in the same dilemma too. (:24).

Understanding this new process will be taught in the coming time to what we call, the pilots of the flying system. To understanding through the knowledge of the soul, not in the craftsman. These new flight systems (FS), which is now part of what we call, the structure of the systems which are built in .. research labs, and now it's getting exported to the places where these units come, you'll receive the .. unit as a FS, but then you have to be able to, put the match to it, that it works, It's set to work with the FS.

It's works to be able to translate the language of the soul, the understanding of the communication in a dynamic state. When you look at this picture (Vision EU helmet), you see it already sits in the structure. When we don't supply this unit (VEU) with the FS, you have a health unit, you have a (materials) production unit, by adding this system into the structure of the FS or EU, (:26). we convert the EU from a Health unit, a wellness unit into a FS.

This is one of the two apparatuses that need to be added to the FS. Otherwise you still have the old system of the EU, which is for the flight, for the health, .. wellness centers, for production of what we call, system, which we run. At birth (shows factory), as you can see these units are all the same. What we build inside, it changes the system. It becomes a wellness unit, if you have a cancer. If the system is built for to be for producing food for people to go in the galley, it becomes a food station.

If we decide to become a FS, you've seen the control system, and the FS added. If you want to be just for psychosomatic to enhance the soul, that the P doesn't suffer, all sorts of problems, it can be done something. So you'll see this feature currently in most of the places where you deal with the process of the KF.

Where in these systems we decide, what line is connected to where. What we allow to enter, (:28). within the cabin. What fields we keep away from the cabin. The FS control and protection is totally different than, what we use the same system for wellness, or for material production. We can tune the system to a specific M field, which you see in the MaGrav solid magnet, that only connects to a strength field of a specific Pl, of a specific material, you might call it an isotope, or we can mix it in a way, then you can make alloys in the condition of the Gans's.

### **Converting Gans back to Matter - Unknown**

Up to now what we have seen you made the Gans's, you dried the Gans's, you have it as a solid matter. But how many of you have managed to convert that dried CuO to Cu? There is a piece of information, which is not taught. You can't stack powder of what we call, Cu Gans once you produce it, into Cu wires and building structure, or whatever you might need it, at time, place, or position. How do you convert this, some places flexible structures, which is unknown to man. (:30).

At the moment you put your buildings in some springs, .. rollers, .. and magnets, that if it comes the earthquake, it can shake and vibrate to absorb the energy. What about building structures, which is like the body of the man on earth. You have .. the beam structure like the bone, and then the flexibility of the movement. Where the movement interacts with the life of the individuals in each cabin. Gives the preference of the pleasure of living.

You have not managed to convert the Gans's into Gans's of life. Up to now your knowledge has been, to bring the T, changing the matter for the first time to energy. Where now we need to teach you how to convert these energies, these Gans's into the matter state (S), otherwise you have bunch of pumps, or bunch of Gans's, or bunch of energies.

The conversion process is important, what we learned up to now, in producing that conversion from matter S to energy. Now we need to learn the energy to the matter S. I can transport you in the manner of the energy of the soul to another position, but how can I create a condition, by the interaction of the environment, that you manifest yourself on earth as you, (:32). again as you, in another position and dimension (D). It's no good going to Tehran to see Azar, where she cannot see you, but you are there as an energy. And even as energy, she cannot recognize your physicality (P), because I don't know who you are. Or my soul knows, but P has not confirmed.

This is what we actually do in the matter S, the material production unit, which up to now we have not covered much. You just know there is a materials unit, producing whatever you need. But don't forget you have Gans's, and Gans's and nothing else.

There is a technique, there is a knowledge to change energy to matter S. Up to now, none of you Knowledge Seekers (KS) have even thought about this. I have Gans's, how am I going to change it to matter S. What do I need to create that conversion?

The material I produced is slightly not the color I want. I want it slightly darker, slightly lighter. You don't have a dye in space to change it. You have to change it with the strength of the fields and emotions of your soul. Or the soul of the material satisfies your soul's needs. When you have the production units for the materials, and you keep on producing energies, (:34). but you cannot convert it.

Where are you going to go. It becomes the position, what I explained to you, the dilemma which is sitting with us in Linz. We have a system active going nowhere, because it has no preset destination, and all it does, it absorbs interaction fields and what it's doing is what I call it, happening itself.

It's a story field D. It is created in a way, the condition of, what we see in our systems, when you look at a composition like this, you want to see a factory. You walk into a factory condition. You want to have the D of a wood, .. of the floor, you want to have the D of liking. You want everything, which is complete. You need composite systems, which can give you all D.

We have this problem now in the P D. It's no good building a structure on the moon where you have to import the materials from the earth, and you cannot keep the composition of wood as wood, because on moon this composition of the wood will become plastic. (:36).

I choose these pictures deliberately, because you need to look. This is your kitchen, what food do you want to make in it. What color you would like the kitchen to be all the time. You like the kitchen to be blue, but your partner would like it to be black, and your child would like it to be green. You all want to enjoy being in this place to share, most probably, even if you manage to create food on earth, but the pleasure of being together to share energy, what we call, the condition.

In another point you come from a factory, you have a composition of materials. You come from work, the work is on the other side of the moon, and you want to keep your wood. In transportation of what you make with this wood from factory to home, you don't want it to change composition. When man starts to emigrating in a large scale, everything has to be precise. We have to develop systems, that can choose colors. I like the car to be yellow, you like to see the same car in white. (:38). Do we deal with each one car, or do we satisfy the emotion of the soul. We can take this car, white from the office to the home on moon, and still your wife like a pink car. She would see it as pink.

You come back to what we call, "integrated plasma systems." In the KF we are developing this T. It's no good for you to go to the moon and everything will be grey, and just a building. It's important once we get you there, you have the facility to create the condition of what is satisfactory to the Soul of the Man (STM), if you want to create the condition of, point of reference. These are the T, which will emerge out of the KF in coming weeks and months.

We gave you the condition to fly. You'll have the spaceships, but what happens if on the way from the ... work to the home, suddenly part of the soul, (:40). wants to be somewhere else? Would you end up on the Mars, or you find out, I came to Mars, I actually want to be home with my wife.

How do we build this new composite structure of the conversion? How do we come to understand? How do we transfer, and at the same time collectively hold on to the structure? You don't want to have a house with 3 floors and suddenly becomes 2 floors. Creation and conversion of the energies is part of the new teachings, which will come up.

In a way, it's for you to decide, as we always said, to be in a field position, to be in a condition of creating materials, or you want to limit. But we don't have the separate compartments on there. We live, we create materials, materials are produced for us, and we meet and we help ourselves with the ?? webmaster, or in the same thing, we go to a herb, you pick up a herb, this is good for a headache, (:42). You go to the plant, this is good for food, energy, but I miss it. We have no apple trees, and we have no leaves, herbs, and we have no .. Cu sources, or spinach to give iron to your blood.

But in the structure of the construction of these new flight systems everything has been built, even the emotion. This is part of what we have already built in the FEU. This is the knowledge, which scientists in your universities and your government, have to still unravel for them, for themselves.

It's not that we give you the EU the flight system, and a material system, and leave you to do it. You have to become knowledgeable to the knowledge of creation. Your scientists have to come to understand this point.

The difference between the EU, which now comes as a flight unit, has an additional factor to it. The factor is your system here, is for your physical body on earth, for its operation and its existence. In the EU you have been, (:44). the system set, to become the passengers of the U.

There is a big gap of knowledge. Our people in the factories are producing things, but they don't understand what sits behind it, and how things have been set, to become not only food of the apple, or the meat on earth, it becomes the food supplier from the depth of the U, that you can survive in that place and position in the U.

It adjusts your brain when you arrive through your soul, to be able to live in that position. You don't jump in a furnace, and you don't jump in a frozen pool. This is the beauty with understanding the totally of the knowledge. Integrated systems, collective integrated systems, for example as I explained to some of our manufacturing and developing research team, if you have a farm, a farmer who grows wheat, grows maize, and the pigs, and you want to grow those to feed the pig, at the same time keep the pig healthy, keep the plant away from diseases, (:46). and you cannot, with your present knowledge, you keep on spraying and watering and whatever, with Gans's.

The new change in T is, that we become that sun. We can feed the plant, we feed the pig, we can look after the pests, and at the same time we allow the cycle of life to be neutral, and natural in the position, time, and space.

It's time for KS to move on, to understand more. The only way I can bring you, and we have set the scene for it, is the 5 Cups, and the Cup of U. The 5 Cups is for the man, now you have to put the 5 Cups, in the Cup of U, for it to be able to survive in the depth of U that being, and included earth.

Now you understand why we taught you separately and in a very time distance gap, between the two. How do you feed, .. look after the man, in the 5 Cups, and his soul, and then, you bring it into the D of the Cup of U, that this man can survive in any position, predestined by the STM, in that point in the space, and the soul of the U.

Now you understand, (:48). how much we have prepared you to become the travelers of the U. In simple steps you made the 5 Cups, .. the Cup of life (CL) .. cup of the gravity, .. the soul, .. of this and that. This is good for you when you are here (on earth). Now you

have to go back into the Cup of U (CU). How do you feed man in a given time, place and position in the U?

Do you remember the teachings of the past, if you've been through it. What did I refer to, we set like schools, premises, systems on earth that you go into and see, if I go to planet Zeus, how will I live, how would I look? That's only can be done with a CU. You create that condition, that position of the U, and you put the man in it, test run, sand box. Now you see how the two merges together.

You were told to destroy the 5 Cups, because they want you to be the prisoner of abuse on this planet. (:50). We gave you the CU to bring you with the CL, Cup of Man (CM) to become the passengers of the U. The time of the slavery is over. Those of you who you destroyed your 5 Cups, you made yourself a slave to the ?? Belgium's.

You need that to be able to see your position, your time, and the space, and the place where you'll land, where you'll be. If you understood this, .. the composition of the two. You are allergic to something, you put the CM, which is you, in the D of you, made by you, in the Cup of Earth, in the CU, and you satisfy the emotion of the soul. Would you have those psychosomatics? No.

Now you see the emergence of the knowledge and the T. We showed you the CL, then .. the 5 Cups, and you fully understood that. We showed you in a very brief time to open the discussion for you to understand the CU. Did you ever ask yourself, why is this guy teaching us about the CU? Because at that time you couldn't see the CM, the CL, in the CU, and then you see the behavior of the man, you see the manifestation of the man, (:52). you see the understanding of the time and the position, in which part of the U you want to be, and these can be produced in these EU, pre-run.

How many you in your lifetime said, oh when next time when I am born, I would like to be a cat? Now you have the CU and the Cup of You, create the condition of the emotion of a cat in your CU, and then you see if you would like to be a cat.

The implication and application of this T is so deep, that some of you will never come to fully be educated to understand the totality of it. The process of the teaching, .. understanding is now to bring the same position. You bring the CL, .. the CM, and then we create the condition of the balanced fields of the soul of the U, and you walk into the system, you become elevated to the balanced fields of the U. You'll never be superior, you'll never be inferior.

This is what I said, when we take man to space, man will be the same as the others. you thought you gathered the whole knowledge. You've been given everything. No, you are again physical. We gave you the condition of the soul.

The STM, (:54). when it becomes a passenger of the U, will be equal to the knowledge to the strength of the soul of the rest. Then he decide what condition of P he takes a position and time, but there is one thing to it. "I made man in the Image of Myself." So

when we go into this D of the elevation of the STM, to be equal to the rest, not the P, then won't you become the image of the Creator? This is the T, this is the universal knowledge, not for you to make Gans's and patches. But as I said before, we had to take you through the education of the nursery and the first class, and how to write and how to read.

Many of you have not gather the knowledge to read the hidden words within my teachings. In so many ways, you can create the conditions of desert in middle of North Pole, if you understood the interaction of the fields. Then you show the desert sands to the man in North Pole, and you'll see the laughter on the face of an Eskimo, that he could never imagine such a thing exists, because the only thing he knows under his feet is mainly ice. (:56).

This is what the T has brought us to. Then how do you understand this. It goes back to all the time, and I keep on emphasizing till some of you gradually, if you understand. Don't look at the structure of the Cup of Man, look at the field interaction of the Cup of Man (CM).

Last night I was at dinner with one of our KS. It was explained the same setup was set, but different colors of materials is shown, but the sets are set one below the other. I said, you haven't understood. Everything is the same, in the boxes, but the fields are not. You're dealing with PI , .. energy flow. One box is blue, .. white, and one box is red. but everything is exactly the same in each box. Move away from physical ?? and start understanding the interaction of the fields. Then you'll start understanding the interaction of the fields in the boxes. You will go to the top you'll become blue, and you go to the bottom you become white, .. middle you'll become red, but in essence it's all the same. (:58).

It's you who changes its manifestation in the time and presence of the field strength. Because these Cups, these systems were not set for the matter S it was set for the soul S. So the soul has respect to each other in the field energy transfer.

Many of you will not understand this, whatsoever, but those of you who have moved to the more advanced levels of the T know exactly what I am talking about. We create a condition of U, we create a condition of understanding the knowledge of creation. As long as you are entangled in the field strength of the matter S, you'll have the same dilemma.

As I said before, you cannot live, .. connect, you cannot keep the life of the CM, if you do not understand the field radiation, that the fields interacts and connects, divides, (1:00). enhances. Once you manage to grasp this idea and understand it, you will see a very simple way, which will be a shock to many of you, something strange, very strange. But as I said, in time you'll come to understand.

When you have your CM setup, and now you have made Gans's, and then you learn to create the condition of the fields, radiation fields, which is the mono-energetic fields of

the U, in these system, as you made the Cup, you will see the shimmers of your own image.

If you get one field radiation wrong, sorry, you will not see the center part, but still exists. If you understand this, then you understand what I have been telling you, that when you come to Linz EC, we put a machine here, and a machine there, and we transfer you across. (1:02).

In the knowledge of the man, the T is complete. It's for you to understand, and interpret and develop. Then when you put this man in the environment of the Cup of U (CU) in the position of planet Zeus, what shall you see. How you will shape on planet Zeus. But as we kept the soul the same, within the structure, is the STM, the same emotion, the same information and everything else that is carried on planet ?? earth. Now you understand the teachings of the CL, .. CM, .. CU. It's you by creating the field strength of an appropriate place, you can see how your soul will react, and how it will manifest itself in that position, time and place.

I used to play a game with my boy when he was very young. I used to tell him I play magic, I used to tell him, I can't see you. (1:04). He used to jump up and down in the house in the rooms, he'd say, "papa I am here, I am here." I used to say, I can hear you but I can't see you. He used jump everywhere, "I am here, I am here," and he believed that I could not see him, but he could hear me. He did all monkey games to confirm that he exists. But he is there.

This will be you landing in Tehran, Azar there but she cannot see you, because you didn't get the right field strength to manifest yourself as a man who moved from London to Tehran, for her to recognize. It's understanding the knowledge, .. the truth, .. the position and time.

This is what we are moving into, as part of what I said in last teachings, as part of the communications, T&T. You create, you elevate the soul, how do you transmute it, and then how you manifest it after transmutation, in the D of the point of observation. It's no good becoming a man, and appearing in Tehran in the kidney of Azar, instead of in front of Azar, because Azar "oops you got the address wrong, slightly." She might feel your soul, but there is no way you can manifest yourself as a man in a kidney, in the size of the man. Mankind will make many mistakes, not only mankind, but citizens of the U, now they know the knowledge. (1:06). Till they get it right. You have to go back, .. to understand totality of the knowledge.

**MaGrav** (1:06:20 to 1:11:30 )

When I gave you this, I gave you something before. Go back, for nearly 7 years now we taught you the MaGrav system. We told you, if you look at it, there is no difference between the MaGrav System and a solid magnet. The solid magnet is created by the earth put together by man, or cut a piece and you have it. In a MaGrav S you have the ability to decide the strength. If you put 2 magnets opposite to each other, by rotation of the few,

and you create electric energy. All of you lot have been playing the wrong games, haven't you? The power station has been sitting in front of you, what Megawatts you want to get out of it. I gave you the same magnet. Your magnet is solid state, this magnet is plasmatic state. Now you see your generator. (1:08).

You looked for the crumbs, and I gave you the full cake. But this is in a solid state. It creates you energy and electricity in the solid ?? state. You put them in D and direction. Now my dear friends, KS, let me open your eyes, what you have had in your hand for a long time. We gave you the MaGrav S to test, and you looked for the little thing which comes out here (electricity), but the purpose was this (fields coming out top).

We gave you the CU, and we gave you the CM. In the kitchen you put the pot on the fire, and within it you cook what you like. (1:10). I gave you the Cup of energy, I gave you the pot. What would you like this man to be, in the pot?

Now you understand, we told you clearly for a long time, that you are missing, you are not connecting the knowledge. Don't go tomorrow, you get a MaGrav and put a pot on it, you put something else on it. Then you are back in the same position as you are today. After 7 years we gave you the MaGrav S. Understand the field flow, understand the interaction of the fields, then you will see you have one of the most powerful generators in the U.

You understand how we have brought you in the knowledge, to become equal in the knowledge to the soul of the U, the same. You're heating the water, and the meat, I am extending the strength of the soul of MaGrav. (1:11:30)

Those who were what we call, the agents of Devil told you to destroy this, and many of you thought it was correct. Now you can see how much you deprived yourself from the KOU. (1:12). What we see is for freeing man in D of the soul, not slaving man in the D of the P, that he can be abused physically and the rest. Those who told you to destroy your CL, and CM are pedophiles with a long history, and by keeping their children, or bringing them to that point of abuse. The children of the man. Those who follow them are of the same school.

We gave you the freedom of the man, through the STM, and the knowledge is step by step, on solid ground. You have time to test, if it wasn't from this week to next week, and the other one. We taught you about the CO2 Cup the first thing we introduced 15 years ago. We took time, we showed you the Cup of Life (CL), we showed you. Nothing was gifted to the man, then what you call the Corona virus pandemic. We start introducing fields, interaction of the fields. Then you start learning about the interaction, creation of the CL Then the CU, (1:14). then still there is other levels of the teaching, which is still to come.

Understanding of the totality is part of the game man has to become used to. The game of understanding of the interaction of the fields, not the matters. If you understand how to

play with the fields, then you can make any matter. As I always say to these teachings, brings you to a new D of understanding, and this is the purpose of this.

Because many of you have to become the passengers of these new crafts. You have to know what you are walking into. You have to understand the knowledge, then in the space by understanding it, you can live a beautiful life, not to be slaved. Instead of the suit of the monkey, as we see with NASA, into the environment of one EU. We just change the prison size, from clothing to a box.

This is the beauty of teaching this way. To bring a new change, but by more and more people to understand, more souls to understand, more educated, not just the man, but the soul of the citizens of the U.

**MaGrav** ( 1:15:46 to 1:28:56 )

Now you fully comprehend, those of you who are at that level, what is set, what is planned for the coming teachings. (1:16). How do we convert these fields to a universal field, to the fields of the P of the man, or the field of the STM.

I gave you the most beautiful S in the MaGrav System, if you understand it, you already have the system to fly. Go back to the recordings of the teachings when we had John in Arizona (AZ) walking between the fields, not walking over the fields. Sometimes if you remember when he walked amongst the MaGrav units, he said, "I can feel." Yes, you could feel, but my dearest friend, you should have done this walk (draws ).

The way the systems were set, were perfect, but the knowledge wasn't there what to do. Stop looking into the MaGrav, start looking in the fields of MaGravs. The beauty of it is, you cannot make 2 systems exactly the same. So when you have a collection, (1:18). you have a collection of the fields of the U, the same as before, interacting at the time, place, and position.

I always say, if you understand it. When you play Lotto, you have 49 numbers, and you have to choose 7. To get out of this 49 to be able to match the 7 which is announced, round about 18 million combinations. If you buy 18 million Lottery tickets, covering all the number combinations, you'll definitely win the jackpot. Some system gives it 14 million, but 18 million ?? core combination, gives you roughly this, because you cover some which are not in the background. You'll win the jackpot.

Understanding this, and understanding now this, plus all the fields of the U to get the jackpot to land on the same place with every cell in the position, you choose the number of zeros here. But, because you have the soul connection with Azar, the number is fixed. (1:20). You already hit the jackpot.

Try to understand the knowledge, try to understand the beauty of the knowledge. You are happy with 40% energy saving on your house living in D of P. But if you know how to tap to this (universal energy), I give you enough energy to supply the whole city from your house.

And with it you receive energy in the field strength of the STM, that you can elevate your soul to any D in the U. But the beauty of it is, if one day the mankind learns how to make the right MaGrav, that elevates the STM, then the man will reach the position of the strength of the Creator. Humanity has a long way to go to create this, because he is still trying to get the 5 Megawatts, and 10 KW. (1:22).

When you look inside the shape of your MaGravs, if you haven't noticed up to now, I have given you the interaction of the D of the soul of the Creator. It's you who has to find it, it's you who has to understand not to make the rings (coils) in the D of P, but make the rings in the D of the soul of the U. And I taught you how to make the CU.

I have shown you the path to the Creator. It's you who has to unravel it, to understand it, to be able to get that path. I have shown you the way to the Creator, I gave you the biggest gift, which was the MaGrav System, and I cried many nights, "when will mankind understand?"

You were looking to elevate your soul, I gave you a system understanding of the T, which gave you, to cover you, to become man of U and Unicoise to become closer to the Creator, to become directly part of the Creator. But unfortunately mankind is still after 30% reduction in the electricity bill, and no place, and no where to land in the U. (1:24).

One day those who listen to these teachings of today will understand, and that day is the day of Methi, which is today, that many of your souls have been elevated to it, to understand. It's your P which has to accept it, the knowledge and to live within it.

Try to comprehend. Do not try to copy. If you look in the brain of the man, structure of the brain .. the same generator exists. If you understand how to work it, you can create the fields, that it reaches the D of the Soul of the Creator. You don't need the MaGrav, because the MaGrav system it is based on the structure of your physical life, in your P.

This (bottom coils) is your reproduction unit, this (middle coil) is your intestine and heart, and this (top coil) is D of STP in the position of the STM. Your 3 stacker is already set. (1:26). It's you who has to understand, would you like to put your finger in the socket, and feed the energy to the house, that you have the light, or you feed the soul and you receive the light of the Creator. Man has denied himself that beauty, by choice.

As I said .. many times to KS, we come here to live, to taste the pleasures and the pains of the man, it understand what has kept man away to understand his own creation, and his own creator within him. We had to taste it, and to enjoy the beauty of it, to understand how we can attract man to the beauty.

Now you understand part of the teaching, now you understand where you missed the knowledge. I bet you tomorrow, and the months to come, we'll still see people trying to make MaGrav systems, to reduce electric bill by 30%, because now the energy bill has

double. The energy of the U and the Creator is free, and in terabytes of energy, not in 1 KW.

I hope you understood the teaching of today. I hope Jalal's team of hidden MaGrav units have taken heed. (1:28). Or you can still work with MaGrav S to reduce electricity. Thank you . for today's teaching and I hope I opened the door in a broader way for you to understand the teaching of the past. In a way, bringing parts together, partially for you to understand more why you have been taught all this time, where we are going, .. heading and what knowledge you need to carry to become the passengers of the U. You become passenger to your soul, not to a craft. That's your choice, choose the donkey or the jet, and mankind at the moment is still walking on the legs, from what we've seen. He has not managed the donkey, let alone the jet. Thank you .. (1:29).

>> **PROOFED TO HERE** >> continues

>> **BREAK** >> 426 KSW March 31, 2022 (1:34).

K- There is something I would like to show you before we go, you just seen it. It literally passed you in the past few minutes, which confirms the teaching of this morning. I referred to it in another teaching, but now maybe it has different meaning. This is just what you saw .. Vertical EU, and you see, where is the MaGrav unit in it (bottom)? You see it because it's set to do that job. There it is. (1:36). The teaching is in line with mass production. Because the teaching has always covered commercialization for people, more people to use it, to become aware of it, and to be able to understand it.

In a way, we kept everything in line, the pot you were looking for, it sits at the bottom, even when we look at .. the Horizontal Units, there is no difference. When you see the HEU, the same process has been set, there is no difference. you see the MaGrav units are there, there is one here, and one here, in different shape or form. So we are not teaching you something that just jumped out of the box. These systems were manufactured over a year ago. It's just been your knowledge to understand it, to the point of understanding it, that some of you, one of you might have seen it.

**MaGrav** ( 1:37:56 to 1:50:41)

No more powerful Pl T, (1:38). has been taught than the MaGrav systems. As I said when I was walking in the teaching hall in .. (Italy) , and when I saw that Spanish couple, the guy was pushing with eyes to get the team moving, and with the MaGrav unit (oh it's just a MaGrav unit). I said the human race is not ready. We were too fast, too early.

The knowledge of understanding, as I said, it's exactly like a toy shop, when you go to buy a toy. You see on the side of the box big numbers, 3, 8, 6, 12, 16. Which means if you buy the one which is with a 3, and you have a child of 1, or even 2, or even 2.5 cannot play with the toy, because the knowledge, the motor coordination has not reached to be able to put a 3 year old toy together. A lot of parents love to give a helicopter, flying and everything, written on the side, 14, for the birthday of the second year, or 3rd to their son, that "oh, I've bought such a good thing," but the child has to wait 10 years, (1:40). to gather the knowledge to be able to fly.

But the question is did the father buy the toy for himself? But, trying to be happy that the child has got it in his name. The knowledge is the same, at an understanding level. When you reach to the point of understanding, you can play with the toy.

The brain, the soul, the knowledge, does not fit the STP, that he can play with the Soul of the U. But has no age gap. It's the maturity of understanding the KOC. It's you who decides that point, that knowledge to be absorbed, the knowledge to be understood, and which way understood, the way you are taught, or the way it suits me. We taught the MaGrav for universal system, become traveler of the U, and you choose a MaGrav to be plugged in and give you 30 volts. We even built a factory for the toys, for infants in Iran.

But the problem is the child is a new born, (1:42). has not even become an infant, to be able to use what is there. Now we understand and you can see. If you look the systems are standing next to each other. If you look the mother sits in the back. As I said, when you look at it, I was joyfully enjoying the commercial. I thought what can I say. If you look at it, in reality, I gave you the source, and in ?? , and I gave you the pot. You have the source, and you have the pot. Bring me the STM, the rest is easy. Would you like to go to any questions

I would like to go back to something. I conferred this to what I call, world leaders (WL), (1:44). some of those who make decisions for many of our lives. When you look at this EU, it's no different then what you see in the life. There is no better way I can explain it, then this. When you look at this VEU, I can parallel it with (a story), what you as humans understand.

This time of the year in northern hemisphere we buy, or I used to buy when I was a young boy, very small black seeds. We didn't know if it was real or not, or they sold us what we call black seed, which you get vegetation from. We used to get this black seed, it's a tradition in the Iranian culture, and the whole of Silk road. We get the leaf of the white berry (Mulberry) and we put this black seed (silk worm) on the leaf. We watch it everyday, when we came back from the school. "Mama is it still black, (1:46). mama, it's not changed?" Mama says, "see I told you, the guy gave you black seed."

Then after a few days, because we created the MaGrav field interaction of that leaf, with the seed, we created a new D of fields. This seed used to start moving, and it became a tiny little worm, and then it started eating the leaf, and then it grew, we were waiting, when it start growing, anxious time, keeping it in a shoe box, starts, everyday you open

the box. Mama it's still a worm. Leave it there don't touch it, change the leaf. Keep the environment the same, and then after a few days, this gorgeous worm wiggling starts putting a silk line out, making a cocoon, but from inside. It uses, to my understanding as a child, his tail as a point of reference and starts silking around it. Then suddenly, the worm, gradually you see the shadow of it, and then you see the cocoon, and we wait anxiously, what it's going to be, when it's going to be the time when we see the freedom, and the butterfly flies. Then because it's in the box we catch the butterfly. For a few second it is ours, and then the butterfly flies. (1:48). It goes free.

This machine is that machine. We already made you the cocoon. You bring the P of the man inside, we nourish it to the KOC, and we get the freedom of the soul, the butterfly. There is no difference. In the point of mutation and conversion. It's understanding the knowledge of the freedom of the STM.

Many times when I look at this system, I say, I wonder which butterflies, and what colored butterflies will come out of this system, when they go in as a moth, as a man, as a D of P, to take the flight of fancy, to become the new, to see a new black seed, and next year I'll have another one. Sometimes we used to keep these butterflies until they laid the eggs and then they used to die. But the STM does not reach that point of death, he becomes part of the other.

We have given you the cocoon you have to make that butterfly to fly. This is the beauty of the knowledge if you understand it. This is where we lacking the knowledge, most of you KS, this part. It's a time for change. We have laid the leaf, we have put the seed in, (1:50). we have seen the worm, cycle of life of man for thousands of years, and now we have made you the cocoon, it's you to understand it.

In the future man will make that silk cocoon from the soul of itself, to allow its STP to become embedded within the STM, and to take the flight of fancy. But the beauty of this is, if you understand it, you can take any flight of fancy, anytime that you wish. Then you can lay your eggs anywhere in the U, as a new cycle of life. (1:50:41)

Any question.

## **Proofed to here>>**

Q; Salomea ... shield of protection .. in the future if you like to go back and refresh our memory, (1:52). .. Romanian community asked me to ask you?

K- I know why the Romanians are asking this question. You have a threat sitting on your northern borders is with Ukraine, You have a fear of nuclear explosion, or chemical attack within the boundaries of Ukraine, or which might extend over, or you become the victims of it. The shield of protection is again, man's way of ?? labeling it. Try to raise the soul of the world leaders, that we do not reach that point. Because if we get to that elevation, then for centuries our children will not suffer with contamination. If we just create a shield for ourselves it's a selfishness that we protect. But I understand both reasons for conditions. We blame the Russians a lot for what they are doing. In

principle we understand it, and a lot of it is wrong. But on the other hand we understand their position to protect the integrity of their culture and their religion. Up to now, we were not, we were kept, we were always considered the Western as a saint. But now we know with the documents released within the past few days, is coming out of what we see, from the IAEA papers in the background, some other organizations, the American government and some scientists, (1:54). have been building, noticing within Ukraine. Finding these kind of things. It goes back, some of it to the leaders of the West. We have to enlighten them not to be, not to make these things in the future, that it leads to these kind of things conditions. We are not pro-Americans, pro-Russians, or pro anything. But when your house gets attacked, when the house is on fire, you do something about it. Now we have enough knowledge and information to know in a very small way, but could be crucial and fundamental, and it came very much into front in negotiations in Istanbul in past few days. When the two cannot trust let's make a no-man's land, a free zone. This is part of the condition, that nobody can create nuclear and biochemical factories in Ukraine. It becomes a neutral position. In essence there is a possibility of both nuclear and biochemical. But if we see biochemical, I have a very good idea, if we see nuclear, I have a very good idea who will do it. ?? for sure it is not Russians. Hundred percent sure it will not be Russians. Because we saw the same thing by the Western world in Iraq. We saw the same game in Libya. So there is a bad reference there. There is a cause, (1:56). for concern from world leaders (WL) to stop playing these games and ... The documents which are opening up, and hearing, it's not a good indication, especially to US in what I call, games in these areas.

In that position, to that effect, try to raise the soul of the WL, that they come to an understanding and these things can be resolved, both in Vatican, in Moscow Churches and now that it has gotten out of hand, in the White House and in the Kremlin. We know families that live 2 km from the Ukrainian border. We are in touch with .. we know the ?/ We are closely in touch with ?/ the Romanian community, to watch for any activity on a daily basis ...

We see if coming from West side of the border. Always have a combination of the 3 Gans's in principle with you. Try to keep the CH<sub>3</sub> out of the position. Make your Gans's in a deep condition of the Gans and not the water. (1:58). Try to use it outside and inside the building. Hold the radiation and hold any chemical effect, into the wall outside, than inside. You can spray the buildings. Try to create and use as much amino acid (AA) into the water you use, that anything which is in balance with the human level is absorbed and kept outside. If it comes to it, that it is used, try to not to touch these areas for 3 to 6 months or maybe up to a year. Because they absorb the energies and usually summer time heat will disperse some of it, but the winter ice will change the composition of the release. What you absorb as a massive energy, it will be released in next 6 to 12 months.

Try to, in a way, you are used to in most of the places, to whitewash. Do not use these things on your clothing, under no circumstance. If you are in a vehicle, you travel, try to wash your car with it, but try to avoid the outside of the car, if you receive contamination. When I was a student in Queen Mary College my focus from the beginning, had a big objection the way I used to share knowledge about this, about nuclear contamination. I

always said, (2:00). When you see the light of nuclear explosion, walk into it, don't walk away from. If you see it, you already in it, it will be a lifetime of misery. This is what I know from the nuclear industry. If you see the light of the explosion, walk to it. If it is too far from you, you hear, or you get, you can control the way I (just) explained. Because when you see the light the field radiation has already passed through your body, and the mutation of fields has already started. But if you are near a chemical or biological effect, it's a biology, biological warfare. Biology means AA, and there is a limitation of how much is in the air. If it's in your direction, if it's not absorbed it will come through the building, .. house. You hold it outside the house, .. the car. E are not all sitting in the house waiting for it, we are traveling, .. shopping, .. going from place to place. You need the 3 (Gans) combination, of the Cu, Zn, and CO<sub>2</sub>, with a huge amount of AA. If you have Cup of Life 1 mix AA into it, if you have CL 2 mix into it, and make sure you have plenty of AA. (2:02). This should attract, your body is another biological body walking. but others absorb it, less will come to you.

If you inhale or you breathy it, you already contaminated, follow the same procedure. But 0.9% salt, that it matches the salt of the body of the man, and it can take it out of the body. Just be patient, do not expect, "I drank it, it should change." It will change gradually, take it out of the body gradually.

Never, there's a difference between the biological and virus. Virus is an energy, biological is part of your body, biology of your body. You handle it totally different way. In a way, you put so many traps in front of it, that it does not get to you by the time. Or you strength of which is earth interacting with the cell of the body .. With the nuclear accident it's the same, you have to cover yourself with the same process. Use a lot of Gans CO<sub>2</sub> with a lot of AA because you have to ... ( audio broke ..

(2:04).

( Mr. Keshe had to leave (2:12). )

K- Can I come in I had to leave .. .

As you were trying to say, if we stop the wars. If we create a condition of ?? the borders by delivery of the EU, that anyone can travel to anywhere any time. These stupid what I call, race of domination between the nations, and making enemy of the others will stop. We've seen it, it's on Ukraine, you just explained it, neutral position. We saw it in the past week. When I was a child Tehran was the only airport in the whole of Middle east in an Arab nation where, and are Israeli airlines used to land. (2:14). If you came from Russia, you came to Tehran and then you get a flight to emigrate to Israel. We lost that point because of what I call, dogmas, and everything which came.

But the strangest thing is the Arab states gathered in state of Israel, in a way, part of the old Egypt in a meeting few days ago. This was unheard of (in past). Because they made another enemy, which is the state of Iran, to bring them, for us to be able to sell them more Why couldn't Iran be part of the same table? What has changed. This separation, creation of division. These things are fed by Rothschild's family.

We've seen Soros now is on the international warrants list for starting the Ukrainian, promoting the Ukrainian war. It's not just Russia who has issued a warrant for arrest of Soros, Chinese have done the same. Because they've seen him, he interfered first in China, now they found the source. He works through Illuminati's and the Vatican. Soros cannot move anywhere anymore, it's a warrant, and if they capture him, even on flight, he'll spend years in Siberia, and in the prisons in China.

We create the new T to create the condition of no borders, sharing of the T and being able to, (2:16). work together. This will stop this position what you've seen in Ukraine. It's literally the job of KS, support of the soul of the WL by the U Council and the rest of the KS, and the knowledgeable KS to bring the T forward, to be able to share by everyone that we don't create borders.

The borders have to be the atmosphere of the U, where it's not a border, it's part of another part, a part of another life. Negotiating to make Ukraine neutral, .. to get some people on our side that you can do more, has to finish. This is what I said to John ... you want me to send you the EU, and then send it to NASA and then they work with you. Or do you want me to send them directly to NASA. Because we are about to ship. It brings a connection. We give a box to NASA, their box is empty. We give the unit to AZ, that box is full, the reactors are getting made. The beauty of it is, I tell to the people in our factory, build units that we can give to NASA too. But let them feel the change in the knowledge. If it is given to them it becomes another point of ?? another point of race. But let them see it. "What can we do, we have an empty box?" (2:18).

As I said ... go back to 1950s when the Americans sent an empty matchbox to Russians, and they waited for it. The Russians sent the matchbox back. The American scientists told the Russians, you didn't see .. Nano wires, very thin wires, was in the matchbox. The Russians .. my friends look through the wire, we have made a hole in it. It become a pipe. The race should be among the scientists, not borders. .. something big maybe 50 years ago, making Nano wires, now is a common knowledge, because we shared it. We didn't make borders for it.

Trying to get Ukraine neutralized, and other satellite countries is, will not work. When will be the next nation, .. next territory, .. next planet, man wants to share ?? ??? ??. The U Community will not allow it. SO look at it 2 ways. Try to teach. It's the responsibility of U Council, to become that soul, that shines upon all, that brings all our world leaders to one point, to bring all our systems to one point. We will see where whole structure moving ?? up.. (2:20). And we don't need to worry about if there is going to be a nuclear war, .. chemical war.

The biggest war we have sitting between the Churches of Vatican .. and the Russian Orthodox Church. If the Russian Orthodox C asks Putin to pull out today, they will be out today. That decision has not been made. These are soldiers, what we call mercenaries of the religion, under the banner of nationalism.

Pray for the soul of the leaders that we don't need to negotiate what's going to happen to other satellite countries next to all the Baltic nations, which are still part of the Russian, .. USSR and they were hoping if one child jumps the .. and see what happens to it, and the rest of us will go to NATO. It will not happen, Ukraine had the military power to battle with, got a lot of support from Americans and the others, ?? they'll wipe them out, they'll become part of the Russian territory within 24 hours. It's a bigger game. But primarily if you are on that border we are keeping a very close touch with Romanian, northern .. we are keeping a very close touch. We haven't left you alone and we'll support you. But ?? try to make as much Gans's as you can in the case,

(2:22).

Any other question

R: .. what about the use of the Potassium Iodine pills? Is that useful?

K- No, it has never worked. It's just a psychological game played. We came to this conclusion years ago in the nuclear industry. If you live around SEK in Belgium nuclear power plants, we have been given these tablets for years. It's not known in public, because I used to collaborate with SEK ... all the people living within a certain radius of SEK have been given the iodine tablets, they have to use it. (2:24).

It doesn't really work. You get more if you look at it, from the walnut. Buy a dry walnut and soak it in cold water. Leave it for a day, it becomes brownish color. This carries more natural iodine than you get in these tablets. Then you use it, mix it with CO<sub>2</sub>, and AA of CO<sub>2</sub>.. It's digestible, and if there is anything it washes out of your body. It's the best source of iodine. Actually ... You just buy .. dry walnuts or now if you can find the fresh ones, and just soak them for 24 hours. Add the CO<sub>2</sub> and AA of CO<sub>2</sub>, if you want, if there is neural damage add a little Zn to it, you can just drink it, the digestive system to wash any nuclear problems. That's the best way .. and most effective way. You can wash your body with it. We see it .. I know this from time in Queen Mary College, (2:26). when we used to get contaminated with chemicals, wash with .. literally zero effect. If you have particle in your body ?? radiation, you can take it. The best .. is walnut. Just soak it for 24 hours, you can keep it, you can freeze it. Don't add Gans's to it until the time of use. You can use it after contamination from radiation ?? ...

We've been in that area very recently ..

Any other question.

K- It's there if there is a need for it ...

Q: ... What technique or method should I use to achieve teleportation in the P?

K- Teleportation if it is impossible, that you can replace and position every cell back into itself, that you leg, (2:28). doesn't appear on your arms, and your arms on your back. The only way to do is to carry the transmutation of the STM, and STP of the man, and that order will be kept when you transmute and transfer position.

(MaGrav)

You need a nuclear power station to transfer one it can be done, 1 cell across totally with all its characteristics and memories. It takes a small MaGrav unit with no power supply to transfer the whole STM and STP of the man. You have to understand the knowledge.

Q: .. Can we beta plus and beta minus decay in a lead acid battery to generate electricity. How do we convert it to a current flow and how to amplify the current to a level that can run a home?

K- Ask the people who know the physical side of I never did electronics ...

Q: What happens if 2 people walk into the EU instead of one, do you get different results now that 2 souls are present instead of 1?

K- What happens if the mother is pregnant with triplets? Do we leave the children behind and just carry the mother, or carry just one of the babies? It's the soul of connection. You don't need to huddle and cuddle each other. (2:30). Usually you go into a box with somebody you know. You have connection with. Sometimes you have to accept the condition you are put, you agree with it, it's temporary, we travel the way we are in the soul, you go your way and I go my way. I don't know if anything happens like this, unless you've been forced to stay with somebody you have no connection with, no understanding, you don't ?? but you have to stay in the same room. or sleep in the same room. It's a weird feeling. It has happened to me once, and I don't want it to happen again. We were on a flight from ..

Each soul decides on its destiny.

Any other question

Q: .. can this heal the body

K- What"

R: FEU can this heal the body?

K- We are not in a healing process. We are in process of enhancing. Healing is job of doctors, we don't interfere, .. enter it. When they couldn't understand that we are in the process of enhancing the soul of the cell of the man, they accuse us of interfering with the medical system. (2:32). We have nothing to do with medical. You enhance the condition, and if it accepts it, it reaches its point of elevation.

Q: ... about why coated wire connection is better as an interface than a coated continuous wire, and what does this interface do with a wire connection, how is the field flow through a wire connection? With connections of 2 coated wires or with a bare wire and a coated wire. ?

K- I understand this question has been asked many times. When you have a wire you connect between one plate and another, Nano coated. You have the matter S still inside it, so you are connecting partially on a superconducting, on a N layer, and partially on a Cu wire, on .. vibration of the atoms. When we ask you to cut and ?? reconnect, now the matter S is taken out. the interface is only on the superconductor level, on a N layer, and only those that can jump that gap, they do it. (2:34). I used to do this as demonstrations if

... I used to carry a carry a small Christmas tree with me, that lights up and flashes. I used to connect it by two wires to a battery.

.. matter S connection established again. So when you cut a N wire and ?? connect it, then, full length of wire, you literally go into superconductor energy absorption and everything else which goes with N materials. I always cut the N wires in connection to another, because then I take the electric current out of it. .. that's why some of you have a failure in your MaGrav systems. You don't N coat properly. You think you N coat, (1:36). but somewhere in one of the twists, it's not N coated. You are running on an energy flow, and then you say my MaGrav S doesn't work properly. One of the best ways when you make your MaGrav coils is to N coat your wires before production of the coils, and then N coat when you finished the whole lot. Don't steam coat it. Go through N coating. Then you see, you'll have a different performance MaGrav ?? Because then you work on the energy transfer in the superconductor level, not through the electron vibration. But when you do the N coating of the wires, before you ?? make sure you don't play much with your wires, just do the coiling, and when you have finished the whole set. You've connected everything, N coat it once more. That you cover any earth connection, or what we call matter S connection.

Any other question. .. thank you form the German group. ... a lot of German come in groups to EC ...

I had 3 powerful people around Europe with me yesterday in the EC. When we went through the presentation .. they were shocked, that how this T has changed, (2:38). and when I finished they said, we set to change the course, now we understand the change. These people are decision makers, these are people who bring changes in the back ground to many things we do in our normal lives, and they were shocked to see. By the time we finished ..

They could not understand, this knowledge is so well spread in Germany and Europe, the KS, and some of these people are totally not aware of it. His words were I am shocked in what I have seen, and we'll see the report from their offices. This morning you have changed something in the 3 men. They want to see the knowledge right across ?? Europe as soon as possible.

Thank you for your support ...

in EC above is the life on earth, below is the man in the space. It's gorgeous ??

Any other question (2:40).

Q: .. glass that has oxides by temperature we have N materials. Is glass a material state, Nano, or Gans?

K- It's matter. It still matter. The process of Gans making is not just by heating. It's allowing to balance its energies with its environment. This is the understanding of when you create N materials. We are not in the molecular S just because we melted it, we heated it, we created N material.

Q: .. is the water on this planet in a N state, material S, which is hydroxide of H, or H Nano, or a Gans?

K- It's a holder of Gans's, but its in the condition of plasmatic field. But it's a matter S condition of the matter. The liquid, like the waters of the oceans carry so much matter S matter in them, that they partially, (2:42). through some of the operation of the earth, have become Nano. So you throw N material into the water in the matter S, so now the oceans are matter S, Gans condition, M field, and allowing through the strength fields, of like universal Cup, to lead to creation of the specific Gans's , which leads to life.

### **(China natural Fe Nano washed to China Sea - start of life)**

We talked about this maybe 4 or 5 years ago, about in northern China, there is an area which iron oxide is prevalent on the beaches. During the summer time with the heat of the summer, and the material itself Nano sizes itself. In the spring and winter time with the storms and the rain, these N materials are washed away, into the rivers, into the north China sea. Because of the presence of the N Fe, and other materials we see the establishment of the first cycle of life in this ocean.

.. the way you put your N Fe in the box and you create that blood, now these N particles create N Gans's, (2:44). which in combination with the protein, which comes from the surface of the water, in the revolving of the oceans with ?? bays, leads to creation of the first life. Then these lives grow so much, that's why we see a vast fishing areas in northern China seas, because the life starts on the beaches where the Fe, which N coats, and then in coming in, the water of the northern sea becomes a Gans pot because they create their own M field environment, and with other N, with other particles of Fe, which are not N coated and they washed in, they create the first cycle of the .. blood, the ?? first cycle of life.

### **Make purest blood that fits every type life on planet**

We know this very clearly. I have done a lot of work on this, and the outcome of understanding this T, is how we produce a lot of different kind of blood, and the way you create different kind of blood. You can create mono-blood system that it fits every animal on this planet. We discussed this with the head of, in Ghana with authorities there, because they said, this fits everyone. When we took the blood to FDA in Ghana, .. their world leading scientists, as consultants for different ex-pats, they immediately see, tested it. That this fits any (blood type). The way you produce it, we can inject it to a man of any kind of blood, .. to an animal, still works the same. There is a specific way, (2:46). to produce human blood, hemoglobin, and if you fit it, it fits everyone, it doesn't matter in deviation.

You cannot inject blood of a donkey into a rabbit or a man. But the hemoglobin blood, the way we produce it fits all of them. FDA scientists tested it and he was shocked. He said, this changes the whole game of the medicine. It's so pure, it carries no infection. The purity of not carrying any infection comes from the Cu N layer. It brings that. in the

body .. you use sulphur and phosphor for this job. But in the condition of the muscle tissue, why your muscles don't rot is not so much with the phosphorus, it's with the Cu itself, which sterilizes the cell system, and I have managed to, it's a specific way to do it, it cannot be done normal, and then you produce blood which fits every creation, every created thing on this planet which is life. You can inject it into a plant, more or less.

Any other question

Q; .. would ?/ hot breathing or an alternative technique of breathing help to make the blood of everyone also absorb radioactive fields?

K- What ?/

R: are there breathing techniques that activate the blood, help absorb or process radioactive particles of fields?

K- Theoretically yes, practically, (2:48). very difficult.

R: So if you are Tibetan yogi you might have a better chance

K- or from the womb of the mother. It just depends where and how it fits.

Q: .. 5+1 question. Why is US putting new sanctions on Iran if K believes that Iran and 5+1 have already reached an agreement behind the scenes. While US and the West are pushing China, Russia, and Iran into a corner?

K- This is a policy game, it's a politic. It's a pure politic. Once this is signed, this time America is committed to it. The way the negotiated .. If again the president changes

(2:50).

The European banks have to go across with eh sacks of Rubles to the Russians for the heating. This is part of the pressure they are putting on Iran to increase the production of the gas in the south Iranian fields. It's all political games played. That the Iranians reduced the production to support the Russians to bring into international currency. The Chinese are supporting it as well the same way. Because they are trying to bring the BRICS into operation very cleverly. Most probably BRICS becoming an official currency worldwide. Because they will not buy Rubles, but they'll accept the BRICS. It's a gamesmanship by China played in the background. Iran is a world victim of it for a long .. for next few days till something is achieved. But in principle everything is done. Iran is used as a .. scapegoat for a lot of them to get what they want and bringing a lot of it.

(2:52).

It's going to be a mayhem in the West if the Russians close the tap. You're talking about 9 million barrels of oil a day, missing from the production, which is about ?? 50% of the worlds production and cannot be so easily replaced, and Russians cannot put a close on it because the pipelines will chuck a block, close. It's a gamesmanship and not much to it. The biggest problem now is how China is playing Russia against the West, by supporting and backing .. Russia, Soros issued a warrant for his arrest. China immediately backed it. We know why, we know the reason because he financed for Vatican the uprising in Hong Kong.

Any other question.

Q: What happens if I put rotary reactors with lead Gans, several reactor with different speeds or heavy materials ...

K- No never touch a lead Gans .. never, ever touch a lead Gans. Change the subject, just forget about it, go somewhere else. Please. ... (2:54). especially making it dynamic. Go and read why fuels were withdrawn and changed from the gasoline. Anything with lead or aluminum, keep away unless you know exactly what you are doing and work under protected environment of it.

R: .. test on lead in gas .. how much it decreased the IQ of the population during that time.

K- How much is increased the Alzheimer's.

Q: ... Walnut shell.

K- It's not walnut shell, it's the walnut itself.

R: The walnut meat then you mean. After removing the shell, then do you dry it.

K- You don't have to dry it, you can still use it wet. You get that substance.

R: How would people use it, would they put it into a CO2 Kit or other ..

K- Yes, you use it in a CO2 Kit with AA, because if you look usually on top of this water there is some oil which comes from the walnut. You can use a hot water and get, it out. You can boil the .. walnut and get the oil out, (2:56). but you get other things out of it when you boil it. You mix it with CO2 and Zn, it's effective for nuclear fallout, if you breath it.

Q: .. if I extract from the Cu Gans the O, the same principle for Tritium and Deuterium, what is left Cu material or Gans of Cu, or the Cu field ?

K- Could you repeat ..

Q: repeats ..

K- Have you ever done it?

Q: I didn't understand that why I asked

K- You always Cu composite when you try to extract the O. It always finds another link to itself. There is a specific way to produce H3 from CH3, .. O from , (2:58). extract o from Cu. Immediately it absorbs another O molecule, immediately. You find out your O turns up to be very fast increasing level of water in the container, because that O is separated will come mix with the H in the environment, but in a specific way you can keep the O. There are a lot people who think they make H, or H3 but in fact if you put a magnet next to it, you see it is not. You actually have a composition of Fe, it's not O or H2.

Q: .. people who have angioplasty or stint can drink the water from Cup 1 or 2?

K- I don't understand it, we don't answer the question . (3:00).

Q: Nikolai .. If the 5 Cup Stacker we made has evaporated all of its water, is it best to simply refill it, or to rebuild it again from the beginning, or do we just continue to go through using the fields?

K- repeat again ...  
Refill it, we do that all the time.

Q: Is oil a Gans, a plasma, or is it really fossil?

K- repeat ..

Q:

K- oil is an AA, in suspension of the atmospheric field interaction. It's like water, (3:02). If you can change the environmental M fields of oil, you can change it to a vapor or a solid without heating. So it's environmental dependent.

Any other question

Q: Jalal ...

K- . I was talking about you .. good things not bad things, I don't know any bad things about you.

Q: I always talk about you every second . .. I am like you, a small magician, I do not show everything I have in my pocket. This is something .. It's not really a question .. Do I must see what is the output, (3:04). of whatever I do, not the input?

K- No, look at what comes to you, the output will decide itself. When you look at what you put outside, you become judge of yourself. A man should never judge himself in that way, what I put out, because then sometimes the arrogance takes over, "I am doing a lot." From what you receive the others will come to it, if you are not ??

Q: But isn't that in your teaching, what you are giving out is important. Because what you are giving out you receive in a similar Pl.

K- Not necessarily. sometimes .. you empty a gap which anything can fit in. And what you receive. Sometimes that gap allows you to receive a higher order. because of the combination of the fields inside. Never measure .. when you start measuring it's the time you have not ... you haven't got, you haven't done enough.

Q: with your

K- I juggle It's the process of understanding for what you are doing, and what the reason is, (3:06). and the way you do it. What you put out and the reason you put out. As I always said, you give from your soul more to your enemies, because they need. In a way, you need it to understand your enemies. That you might be the cause of that animosity, not that you might change them. It's self-awareness you call it of what you receive that, you put no condition on what you give. It's a very fine line, very touchy line. But you have to be there to be it. I was talking to .. a very powerful woman in world of finance. Mehran there is a problem ...

I said ... what we were trying to do and it didn't happen, because we were not ready for it. You see it as something went wrong. It wasn't the time for it.

SO let it be, .. don't have to loose sleep.

She said, .. I learned a lot and you were correct. I was expecting for something to happen that time, and now it is time for it. (3:08). Because now I see how far we were from what we were expecting 6 months ago. .. you have to give on the condition there is somebody, ??? It's no use you giving money to a beggar, who goes and spends it on drugs and alcohol and getting himself in more problems in health, damaging himself and his family.

You think you were generous, but in fact, you created more problem, and you say, oh, I gave and when am I going to get back too. In fact you ? gave 1 Euro you can demise the life of a man, you might loose too, because you were part, partially playing it. SO never count, it's just there, for what has to be done.

Any other question.

Q: .. When you say that H is the release of balance that allows it to exist in different compositions of AA, what do you mean?

K- Exactly what it said. (3:10). All the AA are not the same (Rick not hearing .. )

As we always say, every man with a mustache is not your uncle. Just because we create an AA, not all AA are the same. Every H, with slight deviation in the strength creates a different AA. The same with the Pl, .. O, or N in the AA. So when you produce different type of Gans's, even while you are producing ?? Gans's, depending on if the cat walked by the side of it, if the baby cried, (3:12). if the music was different, if your wife shouted in teh corridor, it changes different composition of AA created in the mixture. Because each one of them introduces them, or takes fields from that box, ?? on a amplify. But according to the emotion and the ?? talk, and whatever is there. It changes the H composition in different strength. It's the same when you produce different Gans's made in the same box, you will see this.

If you go back to ... in the archives to show this, .. I used to use 24 box junction Gans production system. Where there were 24 boxes, each about 2 cm x 2 cm or something like this. It was a box, 24 (compartments) of them. Why they were the same they were slightly different salinity or sometimes the same salinity in certain rows. We could see production of different colored Gans's. We didn't change anything. You could see different thicknesses of AA, different shades of colors. If you look at the AA on the surface of 2 different batches, you'll see the light reflects on them differently because the energy of H, or whatever is a different strength on it. In some of them you don't see any, different shades in them, doesn't matter what you do with it. (3:14). Which means the energy of AA is different than the others, it does not absorb, or it only absorbs, certain field strength.

At the moment the knowledge is not there to be able to replicate, like when you go and buy a tomato ketchup today, and tomorrow, and next week, and next years time, from Heinz always the smell and tastes the same. The knowledge of the Gans's is not that far yet to be able to replicate exact strength. It needs time for scientists to develop these T.

There is a race which is standing outside of this planet, they have mastered this game. They are beautiful people, especially their feature. One day when man becomes peaceful they might teach us in a beautiful way how they do it. They have mastered the game of changing the fields in the lowest level, in the single ?/ atomic structure , as field. They're artists in ?? this .

Any other question.

R; I'll just show a picture that you talked about in the Fukushima video.

K- Yes that's the one. If you look this box is empty , but can you see the different shades and colors in each box. It's the same composition, .. material, but if you look .. they have different colored Gans's in it. Different colors produced. These boxes were original, (3:16). first batteries, Gans PI batteries. That brings back some memories. I used to spend days making these for 1 test, half an hour. ... These 2 boxes are the original boxes where the energy production of the PI was confirmed. the wires were connected to LED, left on the table and for months and months was creating light. We were specifically developing this one . (3:18). It's using Nano wire like a ?? this unit produced electricity for a long time. You could light ... Everyday I used to send a message to BHS to Derek F , that ?? enlightened, that was everyday. We wanted to see for how long, and it went for months and months , finally he gave up and said stop sending me the messages. This thing is going to go for years. It doesn't stop. It produces about a few volts and substance low current. You can amplify and use it, but it gets clogged up with Gans's. If there is a shortcut between the plates, then you get the shortcut and they jump. One day one Gans was one color and the next day it changes to another color, goes from red to blue, and then jumps back into black. It's very interesting understanding of the plasmatic work. There are two of them ...

This was one of the very first power generating units using the PI T. to understand it, compartments to see how it goes. I think one ... one wire comes out of here, (3:20). and one wire goes out of there. I think it is here .... I could change the salinity in each box and see the voltage output. Brought back a lot of memories

Thank you for today I hope we learned a little and shared a little.
